

Condition-dependent bQTL switching: deep dive

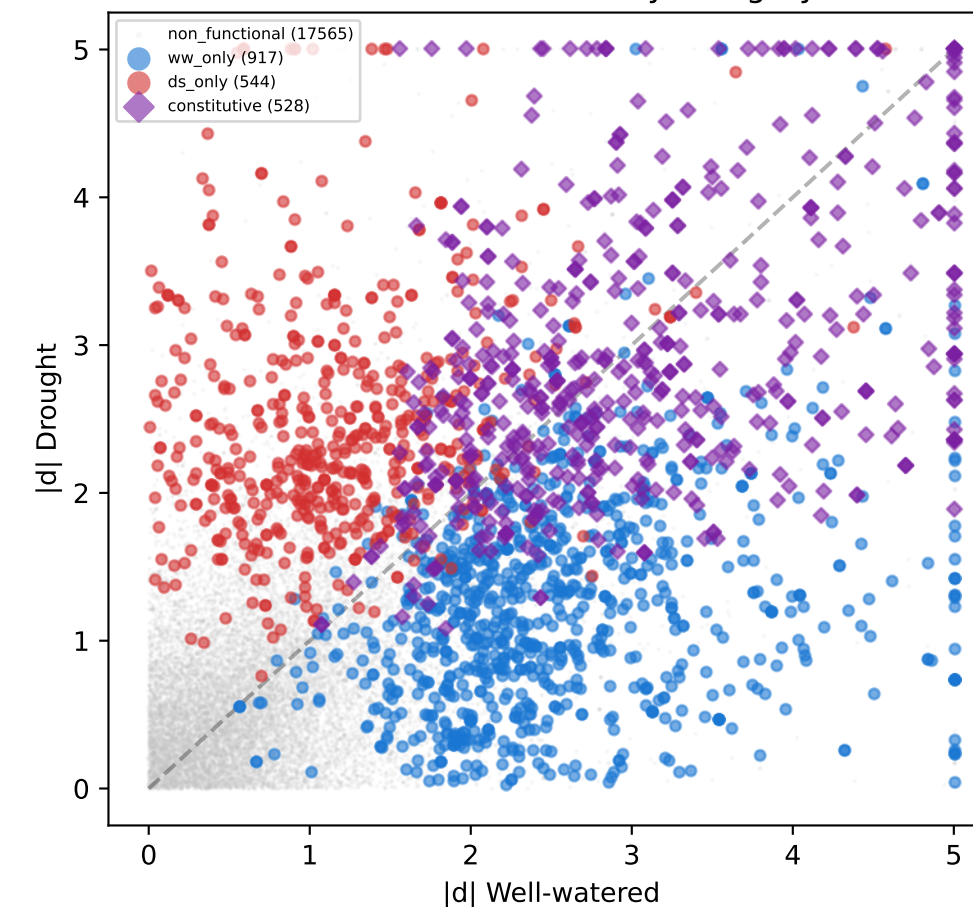

A. WW effect sizes by switching category

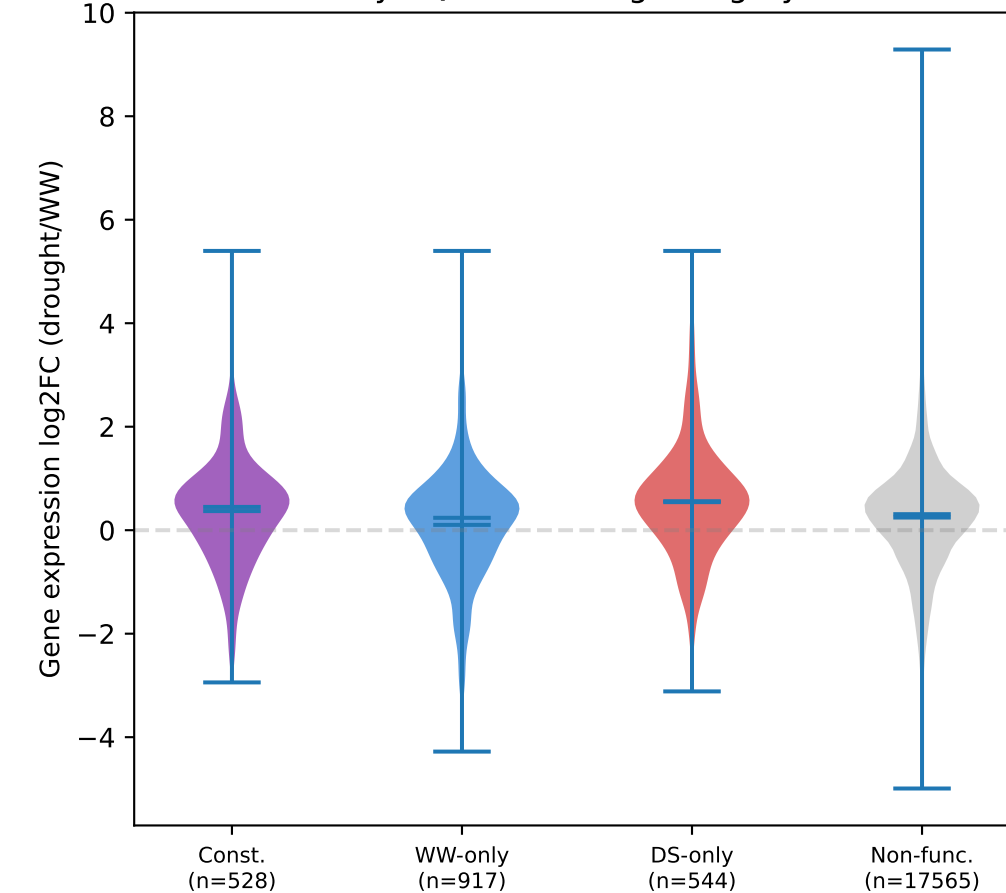

B. Drought effect sizes by switching category

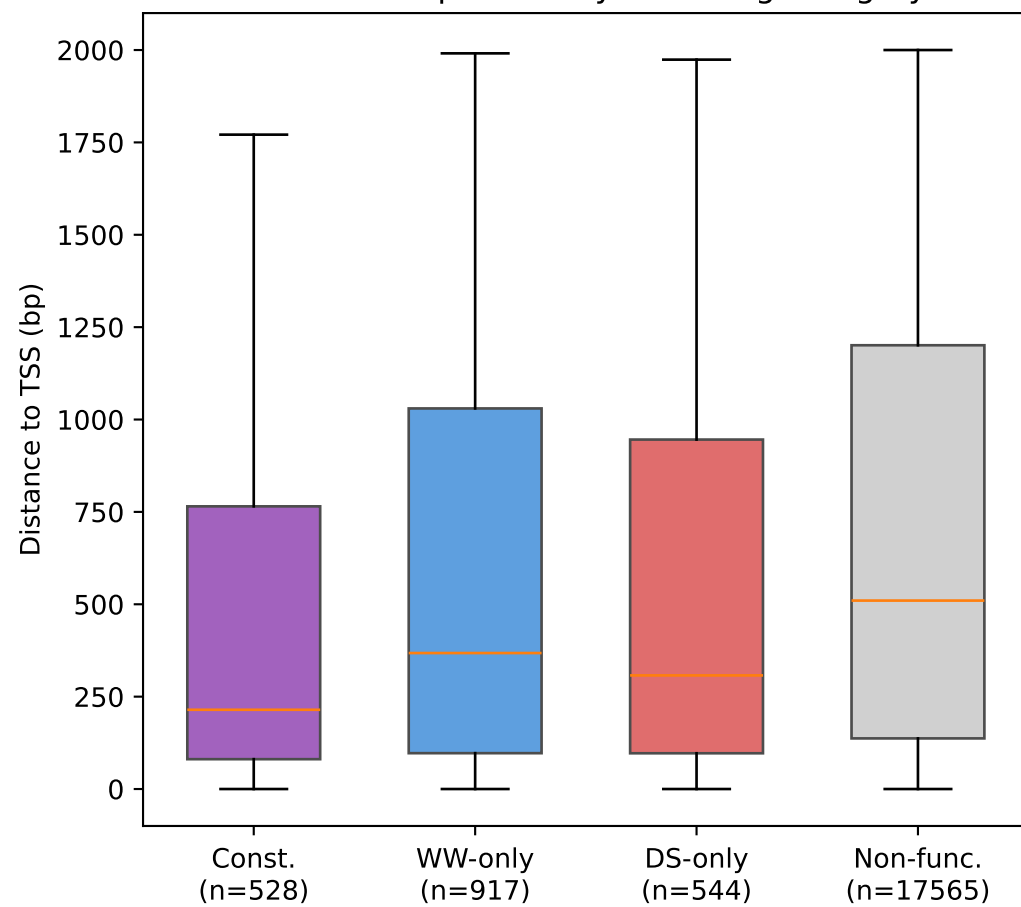

C. Paired effect sizes by category

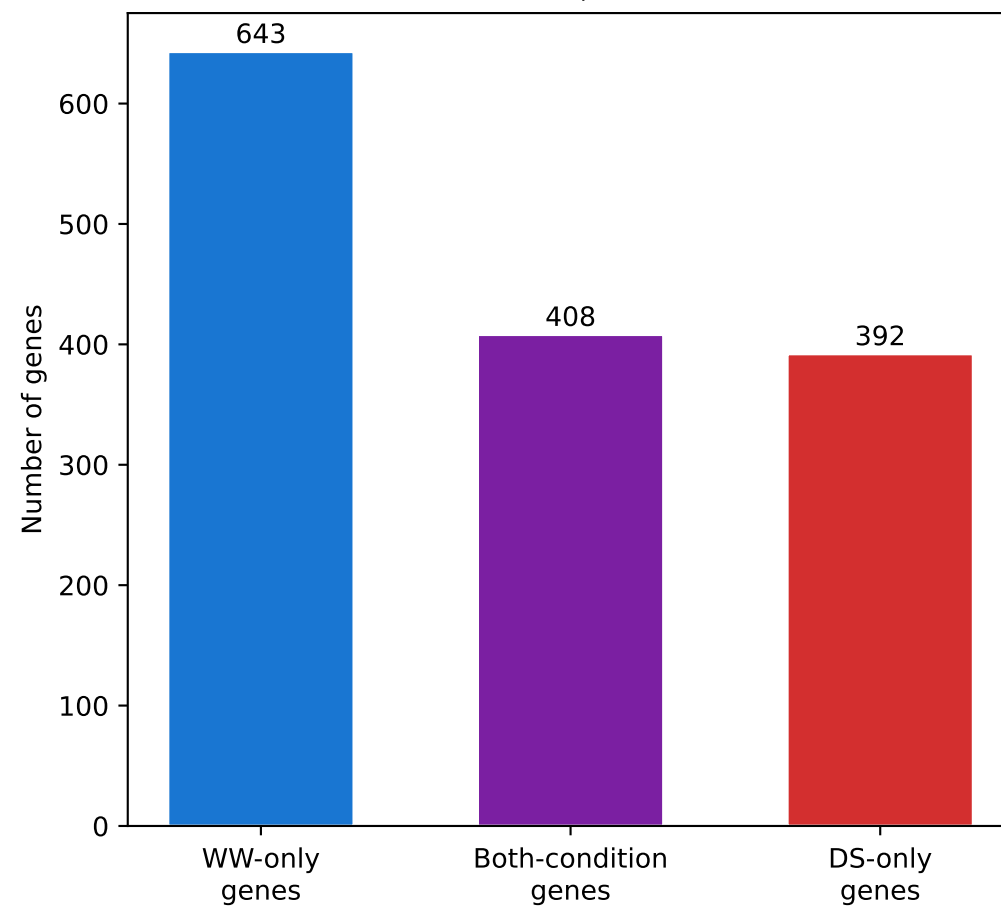

D. Target gene drought response by bQTL switching category

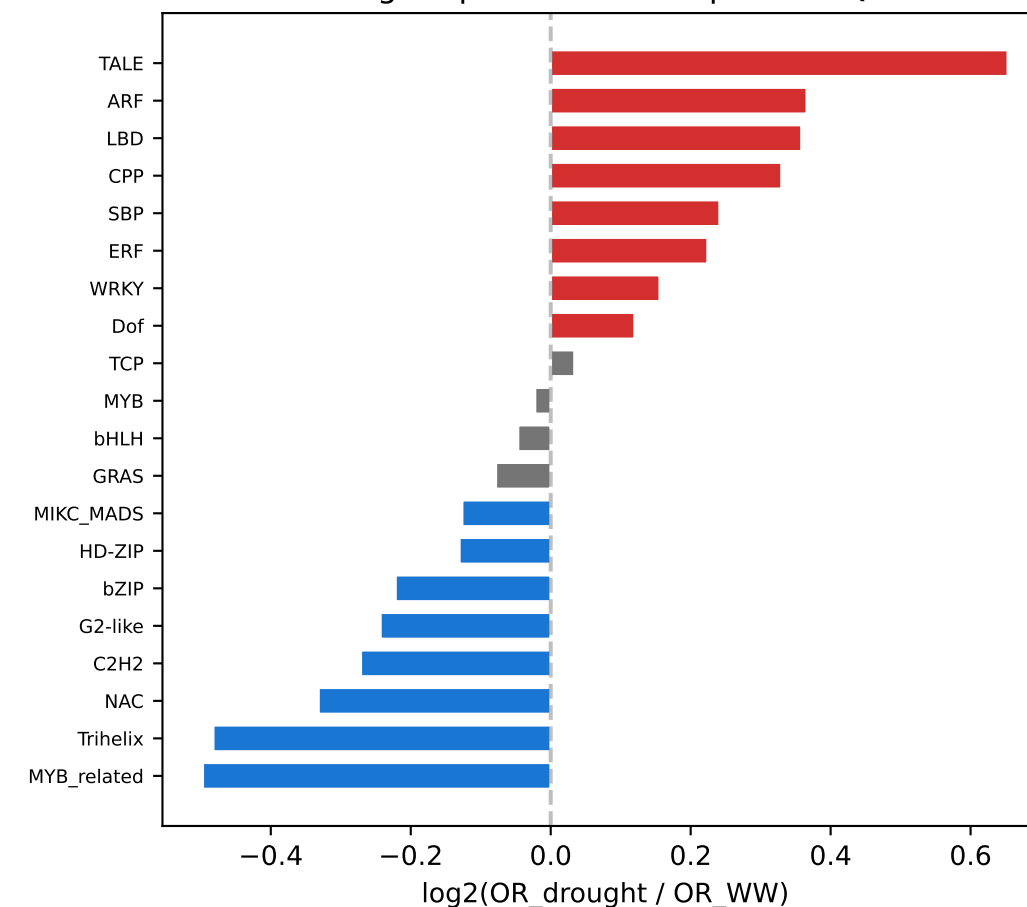

E. Genomic position by switching category

F. Gene-level switching
1051 WW, 800 DS

G. TF family enrichment:
drought-specific vs WW-specific bQTL

H. Effect size ratio (drought/WW)
