A. Motif density: bound vs random
MWU p=5.66e-01
bQTL: 115.2±98.4
Ctrl: 89.7±35.8
bQTL regions
Random promoter
Density
Total motifs in bound region
B. Family diversity: bound vs random
bQTL regions
Random promoter
Density
TF families in bound region
C. Redundancy in bound region
(sole: 24%)
Median=4
Count
Redundant same-family motifs in region
D. Per-family redundancy
